

COMMISSION REGULATION (EC) No 1358/2007

of 21 November 2007

amending Regulation (EC) No 1725/2003 adopting certain international accounting standards in accordance with Regulation (EC) No 1606/2002 of the European Parliament and of the Council as regards International Financial Reporting Standard (IFRS) 8

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Regulation (EC) No 1606/2002 of the European Parliament and of the Council of 19 July 2002 on the application of international accounting standards⁽¹⁾, and in particular Article 3(1) thereof,

Whereas:

- (1) By Commission Regulation (EC) No 1725/2003⁽²⁾ certain international standards and interpretations that were extant at 14 September 2002 were adopted.
- (2) On 30 November 2006, the International Accounting Standards Board (IASB) published International Financial Reporting Standard (IFRS) 8 *Operating Segments*, hereinafter 'IFRS 8'. IFRS 8 sets out the requirements for the disclosure of information about an entity's operating segments. IFRS 8 replaces International Accounting Standard (IAS) 14 Segment reporting.
- (3) The consultation with the Technical Expert Group (TEG) of the European Financial Reporting Advisory Group (EFRAG) confirms that IFRS 8 meets the technical criteria for adoption set out in Article 3(2) of Regulation (EC) No 1606/2002.

(4) Regulation (EC) No 1725/2003 should therefore be amended accordingly.

(5) The measures provided for in this Regulation are in accordance with the opinion of the Accounting Regulatory Committee,

HAS ADOPTED THIS REGULATION:

Article 1

In the Annex to Regulation (EC) No 1725/2003:

'International Financial Reporting Standard (IFRS) 8 *Operating Segments*', is inserted as set out in the Annex to this Regulation.*Article 2*

Each company shall apply IFRS 8 as set out in the Annex to this Regulation as from the commencement date of its 2009 financial year at the latest.

*Article 3*This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 21 November 2007.

For the Commission

Charlie MCCREEVY

Member of the Commission

⁽¹⁾ OJ L 243, 11.9.2002, p. 1.⁽²⁾ OJ L 261, 13.10.2003, p. 1. Regulation as last amended by Regulation (EC) No 611/2007 (OJ L 141, 2.6.2007, p. 49).

ANNEX

INTERNATIONAL FINANCIAL REPORTING STANDARDS

IFRS 8	IFRS 8 — <i>Operating Segments</i>
--------	------------------------------------

INTERNATIONAL FINANCIAL REPORTING STANDARDS 8

Operating Segments

CORE PRINCIPLE

1. **An entity shall disclose information to enable users of its financial statements to evaluate the nature and financial effects of the business activities in which it engages and the economic environments in which it operates.**

SCOPE

2. This IFRS shall apply to:
 - (a) the separate or individual financial statements of an entity:
 - (i) whose debt or equity instruments are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets); or
 - (ii) that files, or is in the process of filing, its financial statements with a securities commission or other regulatory organisation for the purpose of issuing any class of instruments in a public market; and
 - (b) the consolidated financial statements of a group with a parent:
 - (i) whose debt or equity instruments are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets); or
 - (ii) that files, or is in the process of filing, the consolidated financial statements with a securities commission or other regulatory organisation for the purpose of issuing any class of instruments in a public market.
3. If an entity that is not required to apply this IFRS chooses to disclose information about segments that does not comply with this IFRS, it shall not describe the information as segment information.
4. If a financial report contains both the consolidated financial statements of a parent that is within the scope of this IFRS as well as the parent's separate financial statements, segment information is required only in the consolidated financial statements.

OPERATING SEGMENTS

5. An operating segment is a component of an entity:
 - (a) that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity);
 - (b) whose operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance; and
 - (c) for which discrete financial information is available.

An operating segment may engage in business activities for which it has yet to earn revenues, for example, start-up operations may be operating segments before earning revenues.

6. Not every part of an entity is necessarily an operating segment or part of an operating segment. For example, a corporate headquarters or some functional departments may not earn revenues or may earn revenues that are only incidental to the activities of the entity and would not be operating segments. For the purposes of this IFRS, an entity's post-employment benefit plans are not operating segments.
7. The term 'chief operating decision maker' identifies a function, not necessarily a manager with a specific title. That function is to allocate resources to and assess the performance of the operating segments of an entity. Often the chief operating decision maker of an entity is its chief executive officer or chief operating officer but, for example, it may be a group of executive directors or others.

8. For many entities, the three characteristics of operating segments described in paragraph 5 clearly identify its operating segments. However, an entity may produce reports in which its business activities are presented in a variety of ways. If the chief operating decision maker uses more than one set of segment information, other factors may identify a single set of components as constituting an entity's operating segments, including the nature of the business activities of each component, the existence of managers responsible for them, and information presented to the board of directors.
9. Generally, an operating segment has a segment manager who is directly accountable to and maintains regular contact with the chief operating decision maker to discuss operating activities, financial results, forecasts, or plans for the segment. The term 'segment manager' identifies a function, not necessarily a manager with a specific title. The chief operating decision maker also may be the segment manager for some operating segments. A single manager may be the segment manager for more than one operating segment. If the characteristics in paragraph 5 apply to more than one set of components of an organisation but there is only one set for which segment managers are held responsible, that set of components constitutes the operating segments.
10. The characteristics in paragraph 5 may apply to two or more overlapping sets of components for which managers are held responsible. That structure is sometimes referred to as a matrix form of organisation. For example, in some entities, some managers are responsible for different product and service lines worldwide, whereas other managers are responsible for specific geographical areas. The chief operating decision maker regularly reviews the operating results of both sets of components, and financial information is available for both. In that situation, the entity shall determine which set of components constitutes the operating segments by reference to the core principle.

REPORTABLE SEGMENTS

11. An entity shall report separately information about each operating segment that:
 - (a) has been identified in accordance with paragraphs 5-10 or results from aggregating two or more of those segments in accordance with paragraph 12; and
 - (b) exceeds the quantitative thresholds in paragraph 13.

Paragraphs 14-19 specify other situations in which separate information about an operating segment shall be reported.

Aggregation criteria

12. Operating segments often exhibit similar long-term financial performance if they have similar economic characteristics. For example, similar long-term average gross margins for two operating segments would be expected if their economic characteristics were similar. Two or more operating segments may be aggregated into a single operating segment if aggregation is consistent with the core principle of this IFRS, the segments have similar economic characteristics, and the segments are similar in each of the following respects:
 - (a) the nature of the products and services;
 - (b) the nature of the production processes;
 - (c) the type or class of customer for their products and services;
 - (d) the methods used to distribute their products or provide their services; and
 - (e) if applicable, the nature of the regulatory environment, for example, banking, insurance or public utilities.

Quantitative thresholds

13. An entity shall report separately information about an operating segment that meets any of the following quantitative thresholds:
 - (a) its reported revenue, including both sales to external customers and intersegment sales or transfers, is 10 per cent or more of the combined revenue, internal and external, of all operating segments;
 - (b) the absolute amount of its reported profit or loss is 10 per cent or more of the greater, in absolute amount, of (i) the combined reported profit of all operating segments that did not report a loss and (ii) the combined reported loss of all operating segments that reported a loss;
 - (c) its assets are 10 per cent or more of the combined assets of all operating segments.

Operating segments that do not meet any of the quantitative thresholds may be considered reportable, and separately disclosed, if management believes that information about the segment would be useful to users of the financial statements.

14. An entity may combine information about operating segments that do not meet the quantitative thresholds with information about other operating segments that do not meet the quantitative thresholds to produce a reportable segment only if the operating segments have similar economic characteristics and share a majority of the aggregation criteria listed in paragraph 12.
15. If the total external revenue reported by operating segments constitutes less than 75 per cent of the entity's revenue, additional operating segments shall be identified as reportable segments (even if they do not meet the criteria in paragraph 13) until at least 75 per cent of the entity's revenue is included in reportable segments.
16. Information about other business activities and operating segments that are not reportable shall be combined and disclosed in an 'all other segments' category separately from other reconciling items in the reconciliations required by paragraph 28. The sources of the revenue included in the 'all other segments' category shall be described.
17. If management judges that an operating segment identified as a reportable segment in the immediately preceding period is of continuing significance, information about that segment shall continue to be reported separately in the current period even if it no longer meets the criteria for reportability in paragraph 13.
18. If an operating segment is identified as a reportable segment in the current period in accordance with the quantitative thresholds, segment data for a prior period presented for comparative purposes shall be restated to reflect the newly reportable segment as a separate segment, even if that segment did not satisfy the criteria for reportability in paragraph 13 in the prior period, unless the necessary information is not available and the cost to develop it would be excessive.
19. There may be a practical limit to the number of reportable segments that an entity separately discloses beyond which segment information may become too detailed. Although no precise limit has been determined, as the number of segments that are reportable in accordance with paragraphs 13-18 increases above ten, the entity should consider whether a practical limit has been reached.

DISCLOSURE

20. **An entity shall disclose information to enable users of its financial statements to evaluate the nature and financial effects of the business activities in which it engages and the economic environments in which it operates.**
21. To give effect to the principle in paragraph 20, an entity shall disclose the following for each period for which an income statement is presented:
 - (a) general information as described in paragraph 22;
 - (b) information about reported segment profit or loss, including specified revenues and expenses included in reported segment profit or loss, segment assets, segment liabilities and the basis of measurement, as described in paragraphs 23-27; and
 - (c) reconciliations of the totals of segment revenues, reported segment profit or loss, segment assets, segment liabilities and other material segment items to corresponding entity amounts as described in paragraph 28.

Reconciliations of balance sheet amounts for reportable segments to the entity's balance sheet amounts are required for each date at which a balance sheet is presented. Information for prior periods shall be restated as described in paragraphs 29 and 30.

General information

22. An entity shall disclose the following general information:
 - (a) factors used to identify the entity's reportable segments, including the basis of organisation (for example, whether management has chosen to organise the entity around differences in products and services, geographical areas, regulatory environments, or a combination of factors and whether operating segments have been aggregated); and
 - (b) types of products and services from which each reportable segment derives its revenues.

Information about profit or loss, assets and liabilities

23. An entity shall report a measure of profit or loss and total assets for each reportable segment. An entity shall report a measure of liabilities for each reportable segment if such an amount is regularly provided to the chief operating decision maker. An entity shall also disclose the following about each reportable segment if the specified amounts are included in the measure of segment profit or loss reviewed by the chief operating decision maker, or are otherwise regularly provided to the chief operating decision maker, even if not included in that measure of segment profit or loss:
- (a) revenues from external customers;
 - (b) revenues from transactions with other operating segments of the same entity;
 - (c) interest revenue;
 - (d) interest expense;
 - (e) depreciation and amortisation;
 - (f) material items of income and expense disclosed in accordance with paragraph 86 of IAS 1 *Presentation of Financial Statements*;
 - (g) the entity's interest in the profit or loss of associates and joint ventures accounted for by the equity method;
 - (h) income tax expense or income; and
 - (i) material non-cash items other than depreciation and amortisation.

An entity shall report interest revenue separately from interest expense for each reportable segment unless a majority of the segment's revenues are from interest and the chief operating decision maker relies primarily on net interest revenue to assess the performance of the segment and make decisions about resources to be allocated to the segment. In that situation, an entity may report that segment's interest revenue net of its interest expense and disclose that it has done so.

24. An entity shall disclose the following about each reportable segment if the specified amounts are included in the measure of segment assets reviewed by the chief operating decision maker or are otherwise regularly provided to the chief operating decision maker, even if not included in the measure of segment assets:
- (a) the amount of investment in associates and joint ventures accounted for by the equity method; and
 - (b) the amounts of additions to non-current assets⁽¹⁾ other than financial instruments, deferred tax assets, post-employment benefit assets (see IAS 19 *Employee Benefits* paragraphs 54-58) and rights arising under insurance contracts.

MEASUREMENT

25. The amount of each segment item reported shall be the measure reported to the chief operating decision maker for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing an entity's financial statements and allocations of revenues, expenses, and gains or losses shall be included in determining reported segment profit or loss only if they are included in the measure of the segment's profit or loss that is used by the chief operating decision maker. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by the chief operating decision maker shall be reported for that segment. If amounts are allocated to reported segment profit or loss, assets or liabilities, those amounts shall be allocated on a reasonable basis.
26. If the chief operating decision maker uses only one measure of an operating segment's profit or loss, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment profit or loss, assets and liabilities shall be reported at those measures. If the chief operating decision maker uses more than one measure of an operating segment's profit or loss, the segment's assets or the segment's liabilities, the reported measures shall be those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

⁽¹⁾ For assets classified according to a liquidity presentation, non-current assets are assets that include amounts expected to be recovered more than twelve months after the balance sheet date.

27. An entity shall provide an explanation of the measurements of segment profit or loss, segment assets and segment liabilities for each reportable segment. At a minimum, an entity shall disclose the following:

- (a) the basis of accounting for any transactions between reportable segments;
- (b) the nature of any differences between the measurements of the reportable segments' profits or losses and the entity's profit or loss before income tax expense or income and discontinued operations (if not apparent from the reconciliations described in paragraph 28). Those differences could include accounting policies and policies for allocation of centrally incurred costs that are necessary for an understanding of the reported segment information;
- (c) the nature of any differences between the measurements of the reportable segments' assets and the entity's assets (if not apparent from the reconciliations described in paragraph 28). Those differences could include accounting policies and policies for allocation of jointly used assets that are necessary for an understanding of the reported segment information;
- (d) the nature of any differences between the measurements of the reportable segments' liabilities and the entity's liabilities (if not apparent from the reconciliations described in paragraph 28). Those differences could include accounting policies and policies for allocation of jointly utilised liabilities that are necessary for an understanding of the reported segment information;
- (e) the nature of any changes from prior periods in the measurement methods used to determine reported segment profit or loss and the effect, if any, of those changes on the measure of segment profit or loss;
- (f) the nature and effect of any asymmetrical allocations to reportable segments. For example, an entity might allocate depreciation expense to a segment without allocating the related depreciable assets to that segment.

Reconciliations

28. An entity shall provide reconciliations of all of the following:

- (a) the total of the reportable segments' revenues to the entity's revenue;
- (b) the total of the reportable segments' measures of profit or loss to the entity's profit or loss before tax expense (tax income) and discontinued operations. However, if an entity allocates to reportable segments items such as tax expense (tax income), the entity may reconcile the total of the segments' measures of profit or loss to the entity's profit or loss after those items;
- (c) the total of the reportable segments' assets to the entity's assets;
- (d) the total of the reportable segments' liabilities to the entity's liabilities if segment liabilities are reported in accordance with paragraph 23;
- (e) the total of the reportable segments' amounts for every other material item of information disclosed to the corresponding amount for the entity.

All material reconciling items shall be separately identified and described. For example, the amount of each material adjustment needed to reconcile reportable segment profit or loss to the entity's profit or loss arising from different accounting policies shall be separately identified and described.

Restatement of previously reported information

29. If an entity changes the structure of its internal organisation in a manner that causes the composition of its reportable segments to change, the corresponding information for earlier periods, including interim periods, shall be restated unless the information is not available and the cost to develop it would be excessive. The determination of whether the information is not available and the cost to develop it would be excessive shall be made for each individual item of disclosure. Following a change in the composition of its reportable segments, an entity shall disclose whether it has restated the corresponding items of segment information for earlier periods.

30. If an entity has changed the structure of its internal organisation in a manner that causes the composition of its reportable segments to change and if segment information for earlier periods, including interim periods, is not restated to reflect the change, the entity shall disclose in the year in which the change occurs segment information for the current period on both the old basis and the new basis of segmentation, unless the necessary information is not available and the cost to develop it would be excessive.

ENTITY-WIDE DISCLOSURES

31. Paragraphs 32-34 apply to all entities subject to this IFRS including those entities that have a single reportable segment. Some entities' business activities are not organised on the basis of differences in related products and services or differences in geographical areas of operations. Such an entity's reportable segments may report revenues from a broad range of essentially different products and services, or more than one of its reportable segments may provide essentially the same products and services. Similarly, an entity's reportable segments may hold assets in different geographical areas and report revenues from customers in different geographical areas, or more than one of its reportable segments may operate in the same geographical area. Information required by paragraphs 32-34 shall be provided only if it is not provided as part of the reportable segment information required by this IFRS.

Information about products and services

32. An entity shall report the revenues from external customers for each product and service, or each group of similar products and services, unless the necessary information is not available and the cost to develop it would be excessive, in which case that fact shall be disclosed. The amounts of revenues reported shall be based on the financial information used to produce the entity's financial statements.

Information about geographical areas

33. An entity shall report the following geographical information, unless the necessary information is not available and the cost to develop it would be excessive:
- (a) revenues from external customers (i) attributed to the entity's country of domicile and (ii) attributed to all foreign countries in total from which the entity derives revenues. If revenues from external customers attributed to an individual foreign country are material, those revenues shall be disclosed separately. An entity shall disclose the basis for attributing revenues from external customers to individual countries;
 - (b) non-current assets⁽¹⁾ other than financial instruments, deferred tax assets, post-employment benefit assets, and rights arising under insurance contracts (i) located in the entity's country of domicile and (ii) located in all foreign countries in total in which the entity holds assets. If assets in an individual foreign country are material, those assets shall be disclosed separately.

The amounts reported shall be based on the financial information that is used to produce the entity's financial statements. If the necessary information is not available and the cost to develop it would be excessive, that fact shall be disclosed. An entity may provide, in addition to the information required by this paragraph, subtotals of geographical information about groups of countries.

Information about major customers

34. An entity shall provide information about the extent of its reliance on its major customers. If revenues from transactions with a single external customer amount to 10 per cent or more of an entity's revenues, the entity shall disclose that fact, the total amount of revenues from each such customer, and the identity of the segment or segments reporting the revenues. The entity need not disclose the identity of a major customer or the amount of revenues that each segment reports from that customer. For the purposes of this IFRS, a group of entities known to a reporting entity to be under common control shall be considered a single customer, and a government (national, state, provincial, territorial, local or foreign) and entities known to the reporting entity to be under the control of that government shall be considered a single customer.

TRANSITION AND EFFECTIVE DATE

35. An entity shall apply this IFRS in its annual financial statements for periods beginning on or after 1 January 2009. Earlier application is permitted. If an entity applies this IFRS in its financial statements for a period before 1 January 2009, it shall disclose that fact.
36. Segment information for prior years that is reported as comparative information for the initial year of application shall be restated to conform to the requirements of this IFRS, unless the necessary information is not available and the cost to develop it would be excessive.

WITHDRAWAL OF IAS 14

37. This IFRS supersedes IAS 14 *Segment Reporting*.

⁽¹⁾ For assets classified according to a liquidity presentation, non-current assets are assets that include amounts expected to be recovered more than twelve months after the balance sheet date.

*Appendix A***Defined term**

This appendix is an integral part of the IFRS.

operating segment An operating segment is a component of an entity:

- (a) that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity);
 - (b) whose operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance; and
 - (c) for which discrete financial information is available.
-

Appendix B

Amendments to other IFRSs

The amendments in this appendix shall be applied for annual periods beginning on or after 1 January 2009. If an entity applies this IFRS for an earlier period, these amendments shall be applied for that earlier period. In the amended paragraphs, new text is underlined and deleted text is struck through.

B1 References to IAS 14 *Segment Reporting* are amended to IFRS 8 *Operating Segments* in the following paragraphs:

- paragraph 20 of IAS 27 *Consolidated and Separate Financial Statements*
- paragraph 130(d)(i) of IAS 36 *Impairment of Assets*.

B2 In IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations*, paragraph 41 is amended as follows:

'41. An entity shall disclose the following information in the notes in the period in which a non-current asset (or disposal group) has been either classified as held for sale or sold:

...

(d) if applicable, the reportable segment in which the non-current asset (or disposal group) is presented in accordance with ~~IAS 14 *Segment Reporting*~~ IFRS 8 *Operating Segments*.'

B3 In IFRS 6 *Exploration for and Evaluation of Mineral Resources*, paragraph 21 is amended as follows:

'21. An entity shall determine an accounting policy for allocating exploration and evaluation assets to cash-generating units or groups of cash-generating units for the purpose of assessing such assets for impairment. Each cash-generating unit or group of units to which an exploration and evaluation asset is allocated shall not be larger than a segment based on either the entity's primary or secondary reporting format an operating segment determined in accordance with ~~IAS 14 *Segment Reporting*~~ IFRS 8 *Operating Segments*.'

B4 In IAS 2 *Inventories*, paragraphs 26 and 29 are amended as follows:

'26. For example, inventories used in one business operating segment may have a use to the entity different from the same type of inventories used in another business operating segment. However, a difference in geographical location of inventories (or in the respective tax rules), by itself, is not sufficient to justify the use of different cost formulas.'

'29. Inventories are usually written down to net realisable value item by item. In some circumstances, however, it may be appropriate to group similar or related items. This may be the case with items of inventory relating to the same product line that have similar purposes or end uses, are produced and marketed in the same geographical area, and cannot be practicably evaluated separately from other items in that product line. It is not appropriate to write inventories down on the basis of a classification of inventory, for example, finished goods, or all the inventories in a particular ~~industry or geographical~~ operating segment. Service providers generally accumulate costs in respect of each service for which a separate selling price is charged. Therefore, each such service is treated as a separate item.'

B5 In IAS 7 *Cash Flow Statements*, paragraph 50 is amended as follows:

'50. Additional information may be relevant to users in understanding the financial position and liquidity of an entity. Disclosure of this information, together with a commentary by management, is encouraged and may include:

...

(d) the amount of the cash flows arising from the operating, investing and financing activities of each ~~reported industry and geographical~~ reportable segment (see ~~IAS 14 *Segment Reporting*~~ IFRS 8 *Operating Segments*).'

B6 In IAS 19 *Employee Benefits*, the example illustrating paragraph 115 is amended as follows:

'Example illustrating paragraph 115

An entity discontinues ~~a business~~ an operating segment and employees of the discontinued segment will earn no further benefits ...'

B7 In IAS 33 *Earnings per Share*, paragraph 2 is replaced as follows:

2. This Standard shall apply to:

- (a) **the separate or individual financial statements of an entity:**
 - (i) whose ordinary shares or potential ordinary shares are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets); or
 - (ii) that files, or is in the process of filing, its financial statements with a securities commission or other regulatory organisation for the purpose of issuing ordinary shares in a public market; and
- (b) **the consolidated financial statements of a group with a parent:**
 - (i) whose ordinary shares or potential ordinary shares are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets); or
 - (ii) that files, or is in the process of filing, its financial statements with a securities commission or other regulatory organisation for the purpose of issuing ordinary shares in a public market.'

B8 In IAS 34 *Interim Financial Reporting*, paragraph 16 is amended as follows:

'16. An entity shall include the following information, as a minimum, in the notes to its interim financial statements, if material and if not disclosed elsewhere in the interim financial report. The information shall normally be reported on a financial year-to-date basis. However, the entity shall also disclose any events or transactions that are material to an understanding of the current interim period:

...

- (g) ~~the following segment revenue and segment result for business segments or geographical segments, whichever is the entity's primary basis of segment reporting information~~ (disclosure of segment data information is required in an entity's interim financial report only if ~~IAS 14 Segment Reporting~~ IFRS 8 Operating Segments requires that entity to disclose segment data information in its annual financial statements):
 - (i) revenues from external customers, if included in the measure of segment profit or loss reviewed by the chief operating decision maker or otherwise regularly provided to the chief operating decision maker;
 - (ii) intersegment revenues, if included in the measure of segment profit or loss reviewed by the chief operating decision maker or otherwise regularly provided to the chief operating decision maker;
 - (iii) a measure of segment profit or loss;
 - (iv) total assets for which there has been a material change from the amount disclosed in the last annual financial statements;
 - (v) a description of differences from the last annual financial statements in the basis of segmentation or in the basis of measurement of segment profit or loss;
 - (vi) a reconciliation of the total of the reportable segments' measures of profit or loss to the entity's profit or loss before tax expense (tax income) and discontinued operations. However, if an entity allocates to reportable segments items such as tax expense (tax income), the entity may reconcile the total of the segments' measures of profit or loss to profit or loss after those items. Material reconciling items shall be separately identified and described in that reconciliation;

...'

B9 IAS 36 *Impairment of Assets* is amended as described below.

Paragraph 80 is amended as follows:

'80. For the purpose of impairment testing, goodwill acquired in a business combination shall, from the acquisition date, be allocated to each of the acquirer's cash-generating units, or groups of cash-generating units, that is expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units or groups of units. Each unit or group of units to which the goodwill is so allocated shall:

...

(b) not be larger than an operating segment based on either the entity's primary or the entity's secondary reporting format determined in accordance with IAS 14 ~~Segment Reporting~~ IFRS 8 Operating Segments.'

Paragraph 129 is amended as follows:

'129. An entity that reports segment information in accordance with IAS 14 ~~Segment Reporting~~ IFRS 8 Operating Segments shall disclose the following for each reportable segment based on an entity's primary reporting format.'

In paragraph 130, subparagraphs (c)(ii) and (d)(ii) are amended as follows:

'130. (c)(ii) if the entity reports segment information in accordance with IAS 14 IFRS 8, the reportable segment to which the asset belongs, based on the entity's primary reporting format.'

'130. (d)(ii) the amount of the impairment loss recognised or reversed by class of assets and, if the entity reports segment information in accordance with IAS 14 IFRS 8, by reportable segment based on the entity's primary reporting format; and'
